**Features:**

- Same curvature as OEM
- Can be used in combination with OEM and Sunnybrook concaves, resulting in reduced costs
- Boxes are replaceable and reversible, thus providing double life
- Overall weight is reduced without compromising strength

**For complete details on these concaves please see pages 2—3.**

Electronic Versions of this may be found: oneAGCO Document Center-> <Your Brand> -> Parts tab -> Parts Marketing Programs.

**Ordering Procedures:**

AGCO Solutions® On-Line using AGCO Promotional Order Class.

**ALWAYS USE PROMO # 226 WHEN PLACING YOUR ORDERS.**

AGCO reserves the right to rescind or change this offer at any time.

For more information, contact your Field Parts Manager or Inside Sales Representative.

**NOTE:** Concaves were painted in red to aid in visual representation. Actual color of concaves will be black.

## Features and Benefits of These New Rotary Box Concaves

The frames are made with the same curvature as OEM. This means they can be used in combination with both OEM and Sunnybrook concaves. This can save the customer having to buy a complete set to get the benefit of box concave designs.

Boxes are replaceable and reversible. This gives double life to the boxes and the customer will not have to replace the heavy duty frames unless they are damaged. This will reduce the cost and improve performance.

Overall weight is reduced without compromising strength. Easier installation.

### Concave Box Designs:

**(A)** Concave Part No. SBM0543. Standard are a box version of the traditional wire design.

**Replacement Box Part No.: SBM0540C**

**(B)** Concave Part No. SBM0542. Helical “Maximum Thresh” boxes have threshing bars perpendicular to material flow in and axial rotor combine. This means better threshing and less scissoring of straw. Best results in cereals are achieved with 3 of these concaves being used in positions 2, 3 and 4 (from front). This threshing method allows the use of a wider rotor/concave clearance saving power and fuel, most often with a cleaner sample.

**Replacement Box Part No.: SBM0540B**

**(C)** Concave Part No. SBM0541. Smooth “Minimum Thresh” offers very little resistance to material flow and is used as a single concave at the front of the set of 7. Unlike a wire concave with an under slung filler plate, the minimum thresh box does not pulverize canola pods and straw or split pulses. This relieves a lot of cleaning systems’ workload improving both sample and capacity.

**Replacement Box Part No.: SBM0540A**

**(D)** Concave Part No. SBM0544. Round bar concaves give the gentleness needed for large seed crops but also add separation with shoe load when used in the back few positions of a set of 7.

**Replacement Box Part No.: SBM0540D**

## Combine Models Associated with These New Concaves

Massey Ferguson—8560, 8570, 8780, 8780XP, 9520, 9690, 9695, 9790, 9795

Gleaner—A65, A66, A75, A76, A85, A86

Challenger— 520C, 660, 660B, 670, 670B

Coming Again in February 2013!

## “Buy 4 Concaves for the Price of 3”

### Instructions for Ordering On This limited Time Offer

1. Buy 4 for the price of 3 (*Mix-n-Match*) Offer Dates: February 4—March 29, 2013
