- Improved Combine Performance & Capacity
- Fully enclosed rotor design with 6 rows of 0.75-inch spacing, deep chrome rasp bars
- 9 knives on discharge side breakup green stems and viney material to smooth crop flow
- Reduced HP requirements in green stem soybeans & high-yield corn harvesting
- Handles modern high-yield corn while greatly minimizing cob breakup
- Smoother Crop Flow in green stem soybeans
- Factory option on Models R66/R76
- Field-installed* on Models R42, R52, R62, R72, R55, R65, R75, R66 and R76 through local dealer and AGCO Parts Division

**1992 model year or newer*

For combine S/N prior to "HK", extra lube hose parts must be ordered from Service
